

A bright sun is positioned in the upper right quadrant, shining through a large, fluffy white cloud. The sun's rays create a lens flare effect across the sky. The sky is a clear, vibrant blue, and the cloud is a soft, white, puffy mass. The overall scene is bright and clear.

# Bonded Metal-Free Bridge

Retained primary tooth  
Was getting infected

A retained primary molar was removed due to infection

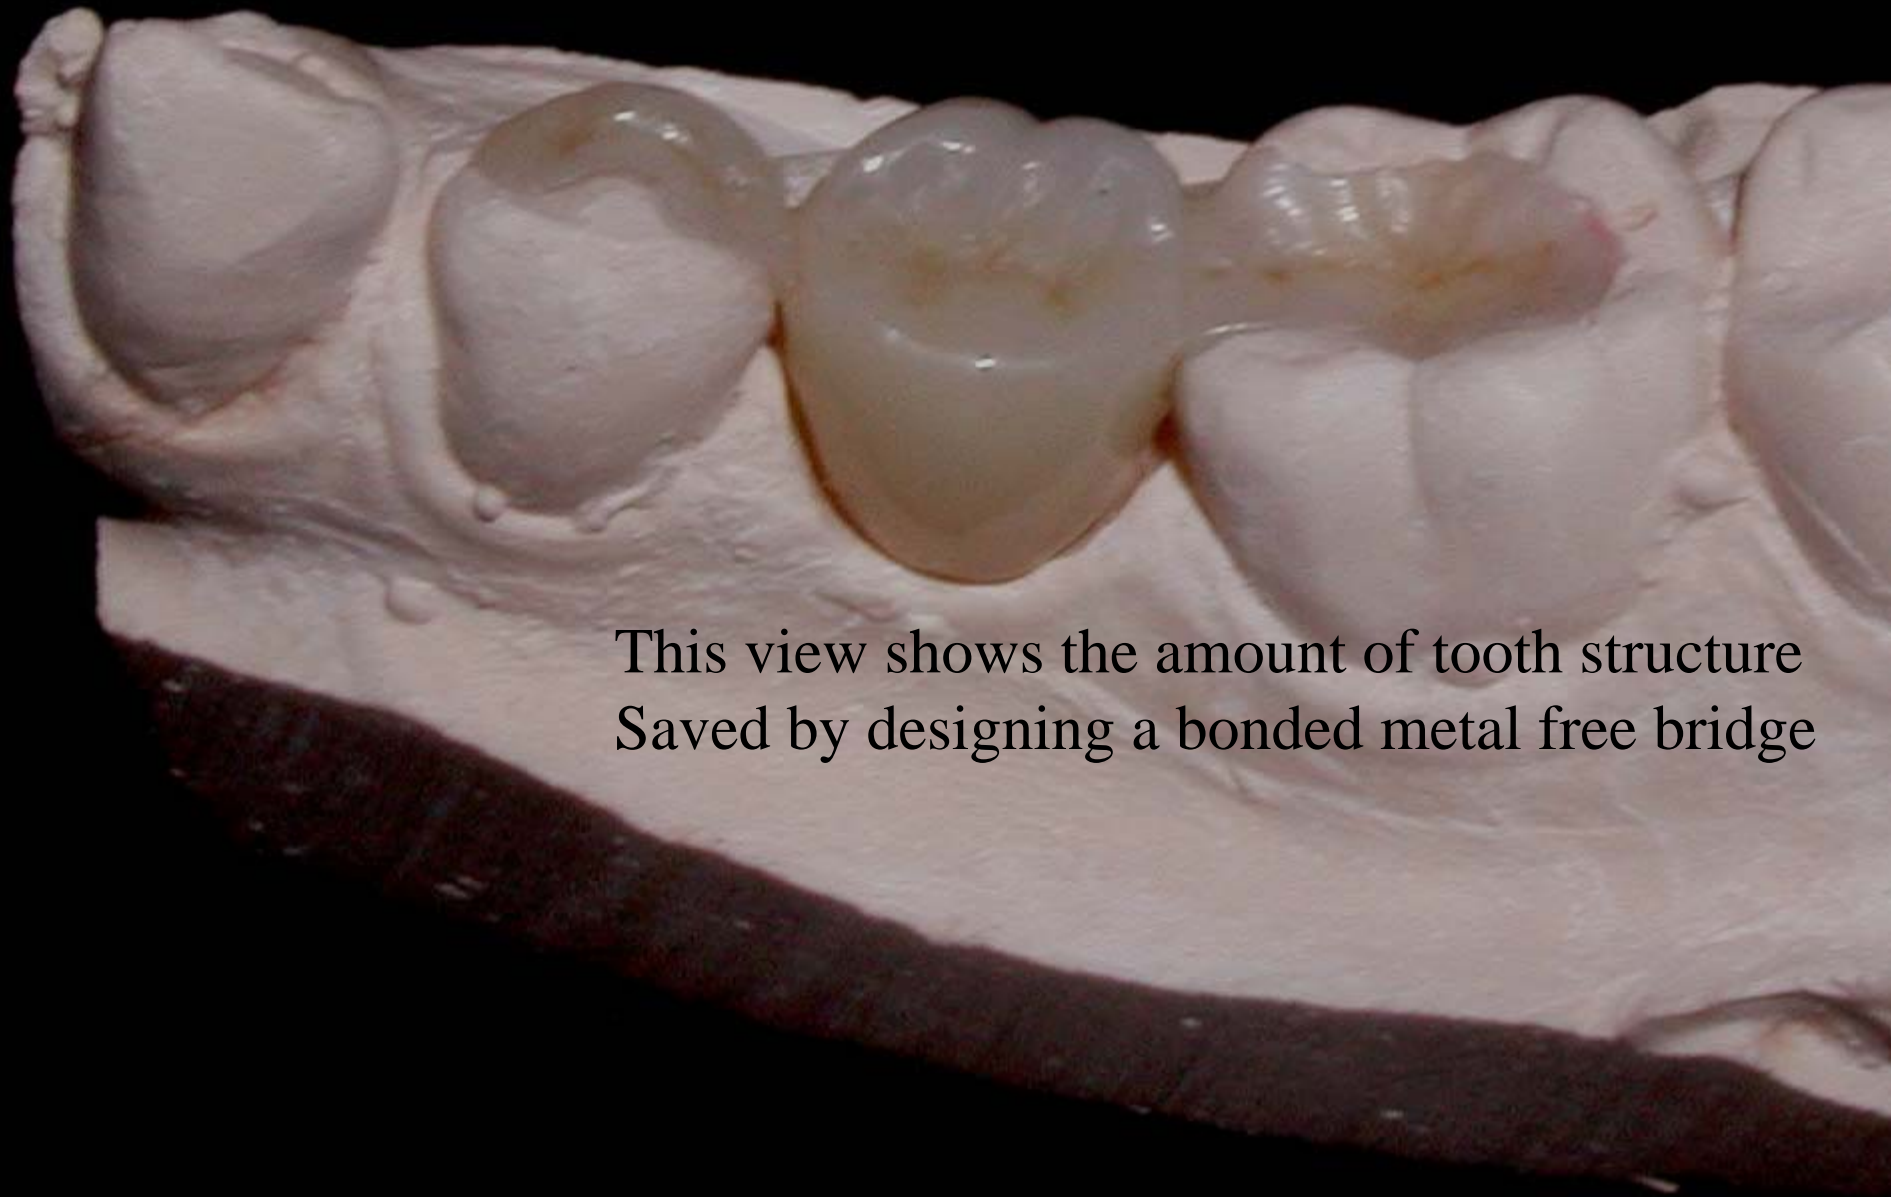

Minimal amount of tooth structure was removed  
To prepare for a bonded bridge.

A conventional Cemented bridge would require  
removal of ALL Of the enamel of teeth on  
either side of the space.

Metal-free bridge on the model

This view shows the amount of tooth structure  
Saved by designing a bonded metal free bridge

Bonded metal free bridge in the mouth

Without any metal, the natural appearance  
Is beautiful and life-like
